

## A comprehensive platform for Standards Based Reliability Prediction Analysis

ReliaSoft's **Lambda Predict** provides a comprehensive platform for Standards Based Reliability Prediction analysis, including all major reliability prediction standards, an extensive set of component libraries, results, plots, reports, and more!

- Supports MIL-HDBK-217, Bellcore (Telcordia), RDF 2000 and China 299B for the analysis of electronics and related components plus NSWC-98/LE1 for mechanical components.
- Available component libraries provide data for over 240,000 components, including capacitors, diodes, resistors, coils, integrated circuits and the electromechanical components from RAC NPRD.
- Provides a complete array of calculated results, plots and reports, including Failure Rates, MTBFs, Pi Factors and other metrics.
- And much more...
