

EXPERT SUPPORT FOR ALL TYPES
OF FMEA AND FMECASM

Xfmea[®]

Xfmea.Reliasoft.com

ReliaSoft's Xfmea software facilitates Failure Mode and Effects Analysis (FMEA) and Failure Modes, Effects and Criticality Analysis (FMECA) and provides flexible data management and reporting capabilities.

Support for Major Industry Guidelines plus Extensive Customization Options

Xfmea supports the major industry standards, such as SAE J1739, AIAG FMEA-3 and MIL-STD-1629A, for all types of FMEA/FMECA analysis, including Design FMEA, Process FMEA, FMECA, etc. In addition, the software provides extensive capabilities to customize the interface and reports.

Easy Data Entry and Time-Saving Shortcuts

You can easily re-use information from any existing analysis or select phrases from pre-defined libraries. The software provides direct integration with Weibull++, ALTA and BlockSim, allows you to link or attach files to the analysis and provides other time-saving tools for data entry.

Actions Management and Support for Team Effort

Xfmea provides extensive actions management capabilities, including automated notifications via e-mail and flexible reports and charts for progress tracking. The software allows multiple users to work cooperatively on the analysis, with the ability to limit access to authorized users, revision tracking mechanisms and more.

Automated Reports and Charts

Xfmea provides a complete set of print-ready reports (generated in Word or Excel) and a variety of pareto (bar), pie and matrix charts for graphical presentation of the analysis.

RPNs and Criticality Analysis for Risk Assessment

Part of ReliaSoft's Reliability Office suite, which also includes:

- Weibull++
- ALTA
- BlockSim (RBD+FTA)
- RGA
- MPC 3 (MSG-3)
- QTMS (FRACAS)
