

XFRACAS

THE ONLY TRULY **WEB-BASED, CLOSED-LOOP,**
USER-CONFIGURABLE, ENTERPRISE-WIDE
FRACAS IN A BOX!SM

XFRACAS provides all of the tools that your organization will need to troubleshoot issues as they occur in the lab or in the field, capture the data required for important reliability, quality, safety and other analyses, work as a team to resolve underlying problems and build a “knowledge base” of lessons learned that will be instrumental to future troubleshooting and development efforts.

The system provides complete support for Failure Reporting, Analysis and Corrective Action (FRACAS/FRACA) activities and problem resolution methods, such as 8D, Six Sigma DMAIC, and others.

XFRACAS is configurable, flexible and scalable to fit your organization's particular products or processes and to grow with your needs. The system's Web-based user interface allows for easy access, collaboration and deployment for multiple sites, suppliers and dealers. Powerful configuration utilities allow you to control the look and feel of user interfaces, establish specific permissions based on user and “entity” (e.g. Product Line or business unit), and much more.

No custom programming required!
